

ENVIRONMENTAL MANAGEMENT POLICY (EMS)

S&L Steel is committed to ensuring that the processes, products or any by-products produced by the company will be as environmentally friendly as is possible under regulations and the by-laws allow and therefore:

- 1 Endeavour to prevent pollution, reduce the consumption of resources such as fossil fuels, energy and disposable materials.
- 2 Wherever possible, reduce waste by efficient material and plant utilisation plus re-use or recycling products when appropriate.
- 3 Communicate with other similar organisations to ensure recycling and disposal techniques remain current or where possible, be improved.
- 4 As required, to observe EMS regulations and procedures.
- 5 Encourage employees and Subcontractors to discuss with the Management any hazard, or possible hazard, so that a satisfactory solution can be implemented.
- 6 Maintain compliance with environmental legislation and any project-specific environmental conditions through training, through monitoring our fabrication processes and by periodic reviews to check whether the objectives of this policy are being achieved.

By maintaining commitment to this policy and to implementing our environmental procedures, the management of S&L Steel aims to prevent problems from occurring and promote continuous improvement towards best practice in environmental management.
